

STANDARD MODULAR INCLUSIONS

STRUCTURE

- 6Homes modular container carcasses are purpose built.
- Heavy duty external steel framing.
- External walls and roof panels are seam-welded, corrosion and weather resistant corrugated high strength steel.
- Galvanised steel framed internal walls.
- Heavy gauge steel floor joists & bearers.
- Heavy gauge steel corner posts for bracing and loading capacity.
- Pressed steel seam welded roofing panels.
- Note that our carcasses were never used as transport containers.

INSULATION

- A thick layer of closed cell polyurethane insulation (R1.5) is sprayed onto the inside walls and ceilings of the steel modular carcass.
- Sisalation is installed between the spray on polyurethane and the adjacent internal steel frame walls and on top of the ceiling frame.
- 50mm Rockwool batts (R1.5) or fibreglass batts are installed into all the cavities of the outer frame shell.
- Rockwool or fibreglass batts are also installed to the internal walls.
- Fire rated gyprock plasterboard.
- The outer modular carcass walls, roof and floor joists are painted in long life weatherproof paint.
- Optional external cladding variations are offered;
 - Fibre cement board with expressed joints; or
 - Timber cladding.
